SILVERADO™

Sometimes being "one sided" is a good thing...

Tired of replacing your drapery because of light fastness issues? If so, SILVERADO™ is for you! This **exciting new fabric** gives you the freedom to choose colors best suited to your needs while eliminating the issue of fading. This **unique concept** is accomplished by printing only on the room-facing side of the fabric and leaving the "sun" side in it's original state. While ever practical, SILVERADO™ offers drapeability that delivers a refined, contemporary look in guestrooms and healthcare facilities. SILVERADO™ provides **99% room darkening**, as well as **sound absorbing** and **energy saving performance**. Not only does it look great, it performs with the best. And, unlike foam-backed fabrics, SILVERADO™ is washable and does not require dry cleaning. With flame-resistant properties, it promises peace of mind for hospitality, and healthcare facilities managers and the people who depend on them.

SILVERADO™

Part of the *NiteTime™* collection

58"-60" Single Sided Color LIGHT BLOCKING FABRIC

SILVERADO™

SILVERADO™ is a 100% polyester F.R. fabric. This product is engineered to withstand the everyday requirements of institutional use. SILVERADO™ is able to sustain multiple washings with minimal or no shrinkage, and no change in dimensional stability or color appearance.

CARE INSTRUCTIONS

- | | |
|---------------------|--|
| WASH CYCLE | Machine wash in temperature not exceeding 160° F
Use synthetic detergent
Do not use bleach or fabric softeners
Do not extract
Avoid prolonged contact with heat |
| DRYING CYCLE | Tumble dry for no more than 5 minutes at temperatures not exceeding 110° F
Remove immediately while still damp
Do not overload dryer or use excessive heat |
| FINISHING | If fabric is rehung upon completion of drying cycle, no finishing is required
Occasional light touch up with hand iron when necessary (275° F maximum)
Use cover cloth between fabric and iron
Do not mangle
Do not use caustic soap |

Performance

This is **NOT** a blackout fabric but has been tested to **99%** room darkening. We suggest that prior to ordering production yardage, customers satisfy their requirements by testing the cloth at the window.
